WORK EXPERIENCE

AEM Senior Frontend Developer

Cognizant Netcentric Oct 2025 - Present

- Architecture and Performance: Adaptation and enhancement of the frontend architecture in AEM for critical functionalities, ensuring robustness and performance optimization in the existing codebase.
- Stakeholder Management: Technical point of contact with the client, organizing and conducting periodic demos to validate solutions and ensure business alignment.
- Coordination and Standardization: Technical link between design (UX/UI) and backend. Implementation and promotion of standardized development practices (GitFlow) to improve project code quality and maintainability.

AEM Frontend Developer

Capgemini Apr 2025 - Oct 2025

- I led the development of advanced functionalities in AEM, such as custom search engines, organizational charts, and large-scale frontend components.
- Focus on frontend optimization and modern practices, improving performance and maintainability of projects in AEM.
- Organization and standardization of development workflows to increase team productivity and code quality.
- Collaboration with backend teams to integrate AEM solutions aligned with business requirements.

AEM Web Developer

VASS Company Mar 2024 - Apr 2025

- Design and implementation of solutions in Adobe Experience Manager, developing custom components and optimizing backend-frontend integration.
- Interaction with clients to define needs, lead component testing, and reformulate functionalities to align with business objectives.
- Development of project-related analytics based on business requests, both at the development level and on the Adobe Analytics platform.
- Evaluation of new functionalities, management of development processes, and strategic input to improve platform efficiency and evolution.
